

**INVITATION TO TAKE PART IN THE EURASIAN BUSINESS SUMMIT TO BE HELD ON JUNE 6 – 12, 2005**  
**LOCATION: Evian, France and Geneva, Switzerland.**

#### CONCEPT

Boasting huge economic potential and expansive economic growth, Eurasia is a territory of vast natural riches and huge intellectual and human resources. It stretches between the affluent lands of Europe and the economic powerhouses of Japan and China, as its influence reaches every country, every company, every businessman and politician in Europe and beyond. Opportunities are countless, mistakes are unwarrantable, policies are continuously shaping and changing, and people are enthused. And now the competition among the regions in the search of foreign investors is intensifying. The territories differ greatly in their potential, business conditions, operational risks and the authorities' efforts to mitigate risks. The establishment of an attractive investment climate has now become the most important issue for the regions of the Eurasian continent.

#### AIM

The aim of the Eurasian Business Summit is to showcase the enormous investment opportunities present across Eurasia to the corporate world. Key decision makers, experts, dignitaries, and ambassadors, along with senior government officials of various countries will converge at the Summit to explore optimal opportunities and current threats, to find ways of overcoming difficulties in development and realization of investment projects.

#### MAIN TOPICS

This year we look back at the dynamic political and economic changes in and around Eurasia, and try to understand their value and their future potential. Looking at the present the Summit will analyze the current economic, political and social realities in the ever-evolving region. With these in mind, the Summit seeks to explore the future, predicting possible dangers, as well as areas of potential prosperity, and, more importantly, your opportunities and possibilities:

- Gateways for Eurasian companies in Europe and globally – entering new dimensions?
- Opportunities for Western investors in Eurasia – exploring the unsaturated Eurasian markets.
- Cross-region trade and cooperation: starting anew or continuing to move forward?
- Which sectors are currently most attractive for investment and why? Sectors of the future.

#### PARTNERS

Remember that the event has been expanded to include our sister summit – the EMA Forum - to provide a detailed and practical outlook on the possibilities in countries outside of Eurasia. Here, with the support of the Swiss Press Club and Swiss business circles, you can look at promising business perspectives in areas as remote as Ecuador and South Korea, South Africa and Panama.

Your participation in promoting cooperation and progress is most valuable. You will join an elite group of politicians, businessmen, analysts, investors, fund managers, bankers, industrialists, and entrepreneurs, supported by mass-media providers, journalists and an excellent LVA Support Team. Participatory names, including the UN, UNCTAD, EBRD, Government of Russia, Kazakhstan, Ukraine, Switzerland, UK, US, as well as SAP, UBS, WEC, EurAsEC, EC, Norilsk Nickel, Severstal and many others, speak for themselves.
