Since January 1999 - Ambassador to the United States of America

Also serves as the Permanent Observer to the Organization of American States

Diplomatic rank: Ambassador Extraordinary and Plenipotentiary

U.S. Representative Curt Weldon (R-PA)

Congressman Curt Weldon represents the Seventh Congressional District of Pennsylvania. Currently serving his ninth term, Congressman Weldon is the most senior Republican in the Pennsylvania Delegation. A Member of the House of Representatives since 1987, Weldon has taken leadership roles on a wide variety of issues, ranging from national security to the environment.

A senior member of the [House Armed Services Committee](#), Weldon served six years as the Chairman of the Military Research and Development Subcommittee, overseeing the development and testing of key military systems, weapons programs, and technologies that fulfill military needs. Weldon has used that position to become the leading House supporter of a national missile defense to protect America's families and communities. Weldon now serves as the Vice Chairman of the full Committee as well as Chairman of the Tactical Air and Land Forces Subcommittee. His role will ensure that our service men and women are adequately prepared for duty in the high-tech world of the 21st century.

Weldon, a major in Russian Studies, has made improving relations with Russia one of his major efforts in the House. He has worked with Russian leaders on a variety of issues, including efforts to improve Russia's energy supply, correct environmental damage, and protect both nations from ballistic missile attack. Weldon is the founder of the Duma-Congress Study Group. This bilateral parliamentary exchange helps coordinate legislative efforts in the Russian Duma and the Congress, which fosters a better working relationship between the two nations. Recently, Congressman Weldon co-authored a comprehensive framework designed to improve the state of relations between the two countries. Titled ["A New Time, A New Beginning."](#) his proposal makes recommendation for cooperative efforts in eleven different areas ranging from defense and national security to space exploration and scientific research.

Prior to becoming a Member of Congress, Weldon worked as an educator at local schools in Delaware County and volunteered as a firefighter in Marcus Hook. As mayor of the Marcus Hook Borough, in which he was nominated twice on both Republican and Democratic ballots, Weldon led the fight to revive the small town that was home to the violent and destructive Pagan motorcycle gang. Utilizing his teaching and public safety skills, Weldon moved on to serve as the Director of Training and Manpower Development for a large corporation.

ARCCI MEMBER OF THE YEAR

Access Industries, founded in 1986 by its Chairman, Len Blavatnik, is a global private equity investment firm with a diversified portfolio in oil and gas, metals, and telecommunications. Companies in which Access holds a significant ownership interest include TNK-BP (one of the largest oil enterprises in the world), the Siberian Urals Aluminum Company (SUAL) (the second largest aluminum producer in Russia), Warner Music Group in New York City (the world's fifth largest music company) and Svenska Bredbandsbolaget AB (the second largest broadband internet and telecommunications provider in Sweden).

ConocoPhillips

ConocoPhillips is an international, integrated energy company. It is the third largest integrated energy company in the United States, based on market capitalization, oil and gas proved reserves and production; and the largest refiner in the United States. Worldwide, of non-government controlled companies, ConocoPhillips has the eighth largest total of proved reserves and is the fourth largest refiner in the world.

ConocoPhillips is known worldwide for its technological expertise in deepwater exploration and production, reservoir management and exploitation, 3-D seismic technology, high-grade petroleum coke upgrading and sulfur removal.

Headquartered in Houston, Texas, ConocoPhillips operates in more than 40 countries. The company has approximately 35,800 employees worldwide and assets of \$86 billion. ConocoPhillips stock is listed on the New York Stock Exchange under the symbol "COP."

The company has four core activities worldwide:

- Petroleum exploration and production.
- Petroleum refining, marketing, supply and transportation.
- Natural gas gathering, processing and marketing, including a 30.3 percent interest in Duke Energy Field Services, LLC.
- Chemicals and plastics production and distribution through a 50 percent interest in Chevron Phillips Chemical Company LLC.

In addition, the company is investing in several emerging businesses — fuels technology, gas-to-liquids, power generation and emerging technologies — that provide current and potential future growth opportunities.

Announcements and Accomplishments

Russia

In September 2004, the company announced its strategic alliance with LUKOIL, an integrated oil and gas company active in Russia and nearly 30 other countries. This alliance includes the creation of a joint venture to develop resources in the northern part of Russia's Timan-Pechora oil and gas province and the intention to jointly seek the right to develop the giant West Qurna oil field in Iraq.

Most people who have heard of Ingersoll-Rand (NYSE:IR) typically think of the company as a construction and mining machinery maker. That's understandable because, beginning with predecessor companies, Ingersoll-Rand has participated in the world's construction and mining industries since 1871. Now, however, that primary identification of Ingersoll-Rand overlooks the company's tremendous diversification.

Today's Ingersoll-Rand is a global innovation and solutions provider with powerful brands and leading positions within its markets. The company features a portfolio of worldwide businesses comprising an enviable roster of leading industrial and commercial brands, such as Bobcat compact equipment; Club Car golf cars; Hussmann stationary refrigeration equipment; Ingersoll-Rand industrial and construction equipment; Kryptonite locks; PowerWorks microturbines; Schage locks and Thermo King transport temperature-control equipment. These, and many other Ingersoll-Rand brands, are positioned as number one or two in their markets.

The breadth of the company's products enable participation in virtually every industrial activity that society engages. This diversity increases opportunities to serve customers more broadly in select markets, such as automotive, construction and general industries, and from a financial perspective, helps minimize the effect of downturns in any given market. We employ approximately 45,000 employees throughout the world, and we operate more than 100 manufacturing facilities, half of which are located outside the United States.

BAKER & MCKENZIE

Baker & McKenzie is the world's leading global law firm. We have provided sophisticated legal advice and services to many of the world's most dynamic and global organizations for more than 50 years. With a network of more than 3,000 locally qualified, internationally experienced lawyers in 69 offices in 38 countries, we have the knowledge and resources to deliver the broad scope of quality legal services required for both international and local clients – consistently, with confidence and with sensitivity for cultural, social and legal practice differences. Our specialty areas of practice cover the entire range of legal issues that companies face when doing business abroad, including corporate, mergers and acquisitions, securities, commercial contracts, banking and finance, taxation, labor law, intellectual property protection, real estate, and dispute resolution.

Baker & McKenzie has had offices in the former Soviet Union since 1989. We now have over 80 lawyers working in our CIS offices in Moscow, St. Petersburg, Kyiv, Almaty, Baku and Tashkent. They are complemented by a team of Russian speaking lawyers now stationed in the USA, many of whom formerly worked in one or more of our CIS offices, thus providing our U.S. clients the ideal combination of availability and expertise both here at home and on the ground in the CIS. The 8,400 lawyers, supporting professionals and staff of Baker & McKenzie share common values of integrity, personal responsibility and tenacity in an enthusiastic client-service culture. We are still guided by the enduring entrepreneurial spirit and demanding standards of our founders. Our professionals are supported by award-winning advanced technologies and sophisticated management systems. These include a single, shared global technology platform, including client intake, financial and billing systems, e-mail, intranet and client extranets as well as global practice standards, a quality audit program and a worldwide conflicts policy.
